AHMADU BELLO UNIVERSITY, ZARIA
Masters in Information Management (MIM)
2024/20245 May Semester Examination
Course Code & Title: LIBS 882 – Web System Design & Management

INDIVIDUAL ASSIGNMENT

Instruction: Study ALL and Attempt any two (2) questions. **Marks: 5 Marks**

QUESTION ONE

A)

i. List and briefly explain any four **logical** HTML tags you know.
ii. Differentiate between static and dynamic web pages.
iii. Give the full meaning of the acronyms a)FTP b) URL C) HTTP D) CSS

B) i). What is a text editor, and provide two examples.
ii). Name three different web browsers.
iii). What is a text editor and give two examples
iv). Differentiate between Internal and External CSS

QUESTION TWO

A) Write the HTML code in that will generate the output below:

WELCOME TO TECH WORLD!

At Robert Service High School

Explore the latest in technology with us. Our sections include:

A. **Gadgets**
B. **Software**
   - **Application**
   - **System**
C. **Programming**

UNITS

- Education and Training Unit (ETU)
  1. Laboratory Management
  2. CBT Management
- *Computing and Academic Support Service (CASS)*
- *Information Technology Academy (ITA)*

QUESTION THREE

A) Write the HTML codes for the table below:

Table with Multiple Rows and Columns with Colspan:		
Month	**Sales**	
	Product A	Product B
January	$500	$700
	$600	$800
February	$600	$800
THANK YOU!!!		

QUESTION FOUR

A) Given the following HTML source code, draw the expected output of the frame if run on the browser:

```
<html>
<head></head>
<frameset rows="25%,75%">
   <frame src="">
   <frameset cols="35%,65%">
      <frame src="">
      <frameset rows="50%,50%">
         <frame src="">
         <frame src="">
      </frameset>
   </frameset>
</frameset>
</html>
```

B) It is recommended to draw an example of what you would like your Web page to look like before you get started. This figure shows an example of a frame layout. Write the HTML code that will generate the output of the frame.

<table>
<tr><td colspan="2">head.html</td></tr>
<tr><td>link.html</td><td rowspan="2">body.html</td></tr>
<tr><td>logo.html</td></tr>
<tr><td colspan="2">footer.html</td></tr>
</table>

QUESTION FIVE

A) Write the HTML codes (tags) that will produce the output below for the form. [8 marks]

NAME: PHONE NO:

SCHOOL:

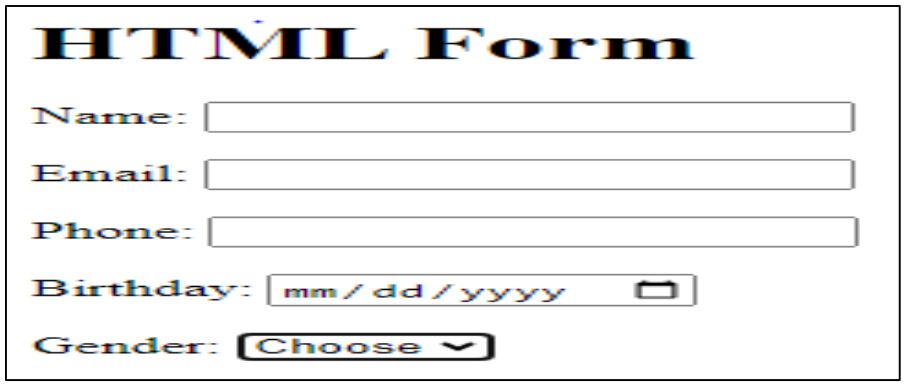
GENDER: O Male O Female

COURSES: ☐ MATH101 ☐ COSC101 ☐ PHYS111

ADDRESS:

SUBMIT

B) Write the code that will create the HTML form below.



QUESTION SIX

A) Write a JavaScript code to multiply SIX numbers and then divide the result by 4

B) List any 3 primitive datatypes in Javascript you know

C) Given the JavaScript code below:

```
var num1 = 10;
var num2 = 20;
var num3 = 30;
var sum = num1 + num2 + num3;
var result = sum - 5;
console.log("The result after adding three numbers and subtracting 5 is: " + result);
```

i) Modify the JavaScript code to add four numbers instead of three and subtract 10 from the result.

ii) Explain the roles of the variables `num1`, `num2`, `num3`, `sum`, and `result` in the provided JavaScript code.

iii) Predict what would happen if the value of `num2` is changed to a negative number (-20) in the JavaScript code.
